

**10.** A method of claim **1**, wherein the at least one preview image includes, at least in part, one or more street-view images, one or more globally registered images, or a combination thereof.

**11.** An apparatus comprising:

at least one processor; and

at least one memory including computer program code for one or more programs,

the at least one memory and the computer program code configured to, with the at least one processor, cause the apparatus to perform at least the following,

process and/or facilitate a processing of at least one preview image presented at at least one device to cause, at least in part, an extraction of camera pose information associated with the at least one preview image;

determine one or more movement interactions of the at least one device relative to the camera pose information to cause, at least in part, a specification of requested camera pose information; and

cause, at least in part, a generation of at least one request to capture at least one media item based, at least in part, on the requested camera pose information.

**12.** An apparatus of claim **11**, wherein the camera pose information, the requested camera pose information, or a combination thereof is specified according to a global coordinate system.

**13.** An apparatus of claim **11**, wherein the apparatus is further caused to:

cause, at least in part, an updating the at least one preview image to present based, at least in part, on one or more movement interactions.

**14.** An apparatus of claim **11**, wherein the apparatus is further caused to:

cause, at least in part, a transmission of the at least one request to the at least one device, at least one other device, or a combination thereof based, at least in part, on a determination that the at least one device, at least one other device, or a combination thereof is within a vicinity of one or more locations indicated by the requested camera pose information.

**15.** An apparatus of claim **4**, wherein the apparatus is further caused to:

determine an initiation of at least one media capture application at the at least one device, the at least one other device, or a combination thereof; and

cause, at least in part, a presentation of the at least one request in at least one user interface of the at least one media capture application.

**16.** An apparatus of claim **5**, wherein the apparatus is further caused to:

cause, at least in part, a presentation of guidance information for directing at least one movement of the device to at least one device location, at least one device orientation, or a combination thereof as indicated by the requested camera pose information.

**17.** An apparatus of claim **6**, wherein the guidance information includes, at least in part, (a) one or more representative images, (b) navigation information, (c) one or more indicators for confirming compliance with the requested camera pose information, (d) wireframe guides, or (e) a combination thereof.

**18.** An apparatus of claim **4**, wherein the apparatus is further caused to:

cause, at least in part, a presentation of the at least one request as at least one push notification to the at least one device, the at least one other device, or a combination thereof.

**19.** An apparatus of claim **4**, wherein the apparatus is further caused to:

determine the at least one other device based, at least in part, on media capture capability information, media capture reputation information, social relationship information, or a combination thereof.

**20.** An apparatus of claim **11**, wherein the at least one preview image includes, at least in part, one or more street-view images, one or more globally registered images, or a combination thereof.

**21-48.** (canceled)
